FIRE RESISTING SECURITY FILING CABINETS

ALL CMI SAFES COME WITH A FIVE YEAR WARRANTY, EXCLUDING FREIGHT AND TRAVELLING, WITH A 24 MONTH WARRANTY ON LOCKS.

CMI Security Filing Cabinets offer first-class fire and theft protection in the one unit.

BODY: Total thickness 70mm. The safe body features a highly efficient fire-resistant mineral compound of extremely low heat conductivity between inner and outer walls of specially reinforced steel. A sealed expanding gasket is fitted around the entire door perimeter to resist entry of heat, smoke and water.

DOOR: Total thickness 90mm. The safes have a heavy steel plate door and frame for maximum strength, with an insulation chamber fitted to the rear. Front and rear locking bolts of 25mm diameter high grade steel provide 2-way locking into the specially strengthened lock chamber

sections at front and rear edges of the door.

Special hinges allow the door to turn through 270° to remain parallel with the side of the safe when required. Hardened steel section and re-locking devices are provided within the door.

LOCKING: All models come standard with LaGard digital lock powered by a 9 volt battery.

INTERNAL FITTINGS: Supplied complete with a filing cabinet of appropriate size. Optionally, may be supplied with a smaller filing cabinet and some adjustable shelves.

FINISH: Painted in attractive durable enamel. Satin finish handles, locks and fascia panel complement the high quality appearance.
